

Name of Water Body: Lagos Lagoon (Back of Mile 2 Bus Stop)

Type of Water body: Lagoon

Date of Monitoring: 18th of September, 2009

Results Location 1:

S/n	Parameter	Result
1.	Air temperature	31.7^o C
2.	Turbidity	0 JJU
3.	Water temperature	29^o C
4.	Dissolved oxygen	4ppm
5.	Ph	7
6.	Depth	1.5m

Comments: The Lagos Lagoon is a Lagoon shearing its name with the city of Lagos. The lagoon is more than 50 km long and 3-15 km wide. It is use for domestic, commercial and industrial purposes. Pollution by industrial and urban waste is a major problem.

Coordinator: Lasisi K.S.A and Titi Akosa

The World Water Monitoring Day Celebration was marked in Nigeria at the Amuwo Odofin Local Government with collaboration with Centre for 21st Century Issues (C 21st).

General Report:

The day activities commenced with a lecture in the Local Government legislative chamber. A lecture title: Healthy Water, Health People was presented by Lasisi K.S.A. The actual water monitoring was carried out at the jetty of Mile 2. The Lagos Lagoon was monitored due to its proximity to the Local Government secretariat. The Lagos Lagoon is a Lagoon shearing its name with the city of Lagos. The Lagoon is more than 50 km long and 3-15 km wide. It is use for domestic, commercial and industrial purposes. Pollution by industrial and urban waste is a major problem. Present at the occasion was the Executive Chairman of Amuwo Odofin Local Government, Comrade Ayodele Adewale, environmental health officers, top local government officials, youth within the local government. The total attendance for the programme was 50. Like most part of the Lagos Lagoon, the Mile 2 jetty was characterized with various human activities.
